

# *THE THREE MUSKETEERS AIN'T GOT NOTHING ON OUR THREE BUDDIES*

---

If you have been following our newsblasts you know we are passionate about protecting your health.

That is why we offer a trio of dust shrouds that work with your hand held tools to collect 99% of airborne dust during sawing and grinding uses.

## **The Dustie**

Its FlexFlange collar allows this shroud to easily attach to most 4" and 5" inch hand grinders for use in concrete grinding applications and meets OSHA guidelines.

## **The DustBuddie**

Readily fits most hand grinders. Riding on a spring cushion to prevent dust from escaping, the short brush skirt improves lateral motion on uneven surfaces. Made of clear polycarbonate, this tool is durable and a breeze to use.

***And we are pleased to introduce***

## **The CutBuddie**

Our newest member of the team, the CutBuddie, is especially effective for cutting, tuck pointing or crack chasing with a hand grinder. The CutBuddie comes ready to use with an integrated universal adaptor. The see-through shroud enhances operator visibility for more precise dust free cutting.
