

Bit Buddie Dustless Shroud

DUS-55011

Features:

- Vacuums up dust and slurry as it is made
- Vacuum pressure holds it in place – no clamps necessary
- Compact design for tight places
- Excellent for drilling faucet holes in stone countertops
- Save time and money associated with clean up
- Use with core drills or percussion hammers

The Bit Buddie dust and slurry control system is for use with drills, hammer drills and core drills. Fast and easy to use, the Bit Buddie dust and slurry control system is held in place by vacuum pressure. No clamps or braces are required. Simple turn on the wet dry vacuum and put the Bit Buddie where you want it, and you're ready to drill. The 1-3/8 inch size is great for drilling faucet holes in stone countertops or any other place where space is tight. It allows you to drill close to a wall or other obstacle and capture the dust or slurry as it's made.
