

Dustie Dust Shroud

4"-5" DUS-55007

6"-9" DUS-55008

Dustie® Dust Shroud

The Dustless Technologies D1838 Dustie® provides for dust-free concrete grinding. The Dustie® captures 99% of airborne particles at the point of origin, never letting them contaminate your environment. The Dustie fits easily on most hand grinders. And with the premium quality double row turbo diamond cup wheel, you can successfully tackle tough concrete jobs.

- Captures 99% of dust at the point of origin
- 5" fits most 4" to 5" hand grinders; 7" fits most 6" to 9" hand grinders
- Attaches quick and easy with Flex-Flange™
- Adjustable and adaptable
- Premium quality single row turbo diamond cup wheel for fast, smooth grinding

Protects Workers' Health and Eliminates Cleanup

The Dustless Technologies D1838 Dustie® meets OSHA guidelines and improves worker health and safety. Designed to be used with the Dustless Wet Dry Vacuum for effective dust control, the Dustie® keeps particles from escaping, and the vacuum keeps dust contained. Simply attach the vacuum hose to the Dustie®, and you won't have to worry about leaving a film or cleaning up messes. The Dustie's innovative design keeps your work environment clean and safe.

Fits Most Grinders with Ease

The Dustless Technologies D1838 Dustie® is designed to fit most four-to-five-inch grinders, including Makita, Bosch, Dewalt, and more. The attachment collar of the Dustie® is a Flex-Flange™, which spreads and contracts to fit any make of hand grinder. Simply slide the Dustie® onto the grinder and then tighten the band clamp around the flange. You may need to trim the tips of the Flex-Flange™ to adjust the height to fit your specific grinder. If you use your grinder for tuck pointing, crack chasing, or decorative concrete cutting, you will want to use the optional cover plate. Trim a section off the front edge of the Dustie® and snap the cover plate into place. You can choose two different operation angles from the molded cut lines in the Dustie®.
